End time 1		0		11.00		11.00		14.00		14.00		12.00		0	
Hours/day				10.00		10.00		13.00		13.00		11.00			57.00
<b>Factory</b>															
Start time 1	N/A	0	0	0	84.00	6.00	12.00	6.00	10.00	6.00	10.00	6.00	N/A	0	
End time 1		0		0		18.00		20.00		20.00		18.00		0	
Hours/day						12.00		14.00		14.00		12.00			52.00

Low risk factor

Medium risk factor

High risk factor

### Risk and Recommendation Summary

<b>Risk 1</b>	Drivers working more that 3 night shifts continuously per week needs to be reviewed. Drivers hours need to be reduced - HIGH RISK ELEMENTS
<b>Recommendation 1</b>	Produce is required to be delivered within 24 hours of picking. Produce can be collected at 7am each morning and taken for processing by 1pm that day. Deliveries can be completed by 4 pm that day removing the need for night work. Additional factory staff must be bought in during the busy periods on Wednesday and Thursday to reduce driver's hours
<b>Risk 2</b>	Factory workers are working over 12 hour days making this a high fatigue risk situation - HIGH RISK ELEMENT
<b>Recommendation 2</b>	Employ additional two people to reduce hours worked to 12 or less by each individual
<b>Risk 3</b>	Factory workers are required to work over 50 hour per week - Bottom end of the medium fatigue risk range
<b>Recommendation 3</b>	As this risk is at the lower end of he medium risk scale, monitoring is all that is required. The adoption of recommendation 2 may address this risk by reducing overall hours to for employees.

### Notes

There are known working condition that bring about fatigue in the workplace. This chart is based on those factors and identifies the areas of concern for fatigue among workers at ABC Fresh Food Providores. Overall the risk of fatigue is low to medium (see Risk Assessment Guide tab)
